4 An aircraft is regarded as infected with Yellow fever if it has started from or alighted in any Yellow fever infected area and subsequent to such starting or alighting, has not obtained a certificate of disinsectisation from an authority specifically approved by the Government of India for this purpose stating that the aircraft, after leaving or alighting in the Yellow fever infected area and before arriving in India, has been disinsectised in accordance with the procedure prescribed in Schedule VIII (coy attached) to the Indian Aircraft (Public Health) Rules, 1946 :—At present the following authorities are approved :—

(1) Ministry of Health of U.K. (2) The Government of Egypt.

(3) The Government of the Sudan. (4) The United States Public Health Service. (5) The Netherlands Government.

NOTE.—Countries desirous of being placed on the "approved" list are advised to study the detailed requirements as explained in the abovementioned Schedule and to approach the Government of India for being placed on the list of approved countries. CERTIFICATES OF INOCULATION AGAINST YELLOW FEVER WILL NOT BE REQUIRED FROM PASSENGERS WHO START IN AN AIRCRAFT AFTER AN "APPROVED" DISINSECTISATION AND ARRIVE IN INDIA WITHOUT THE AIRCRAFT HAVING PASSED THROUGH AN ENDEMIC YELLOW FEVER AREA EN ROUTE.

5 Satisfactory inoculation against Yellow fever is one which has been performed :—

(1) not less than 10 days before arrival in a yellow fever infected area (or embarkation in a yellow fever infected aircraft which is regarded as a moving Yellow fever infected area) or not less than 15 days before arrival in India ; and

(2) not more than four years before departure from the Yellow fever infected area.

A person reinoculated before the expiry of the 4-year period referred to above is regarded as being satisfactorily inoculated forthwith. If, however, this reinoculation is performed after the expiry of the 4-year period, the reinoculation is regarded as a fresh inoculation and in that case either of the minimum periods referred to in (1) above has to elapse before the inoculation is regarded as satisfactory. Ordinarily only those certificates of inoculation are accepted by the Government of India which are issued on the International form (prescribed by the International Sanitary Conventions 1944) by the competent authorities designated by the National Health authorities concerned and which show that inoculation has been performed with any one of the Yellow fever vaccines approved by the Government of India, namely those manufactured at any of the following Laboratories or institutions.—

1 Rockfeller Foundation Laboratory, New York.
2 U.S. Public Health Service Laboratory, Hamilton, Montana.
3 Pasteur Institute, Dakar.
4 South African Institute for Medical Research, Johannesburg, South Africa.
5 The Wellcome Research Institute, London.
6 Service Nacional de Febre, Amarela, Brazil.
7 Institute de Estudios Carlos Finlay, Bogota, Colombia.

All these vaccines have also been approved by U.N.R.R.A. If and when any further vaccines are approved by the World Health Organisation or its interim Commission the Government of India will ordinarily approve them. Any Yellow fever inoculation certificate is liable to be regarded as unsatisfactory and therefore rejected, if the Goverement of India are not satisfied that reliable arrangements exist in the country of origin for the efficient cold storage and administration of the vaccine.

6 In the rare case of a person who has been protected against Yellow fever by a previous attack of the disease the certificate of immunity against Yellow fever on the Internationally prescribed form will be accepted.

7 This bulletin supersedes the one issued by the Public Health Commissioner with the Government of India in June 1941.

NOTE.—The Government of India have placed no health restrictions on passengers arriving in India from abroad except in respect of yellow fever but all incoming passengers are advised in their own interest to be in possession of valid certificates of vaccination against Smallpox and of inoculation against Cholera

1859 P. MC. ISAAC, *Principal.*

OFFICE OF THE COMMISSIONER OF LABOUR IN MYSORE, BANGALORE.

WORKING CLASS COST OF LIVING INDEX NUMBER FOR BANGALORE CITY FOR THE MONTH OF MAY 1948.

A rise of 2.6 Points.

The Cost of Living Index Number for the month of May 1948, works up to 277·9 points, registering a rise of 2·6 points above the previous month's figure.

The index number of the Food group advanced by 4·0 points, owing to a rise in the prices of Ragi, Coffee Seeds, Onions, Vegetables, Fruits, Gingelly oil, Ground nut oil, Tamarind and Chillies.

An increase in the price of Firewood resulted in the rise of the index number of Fuel and Lighting group by 2·1 points to 239·5 points.

The index number of miscellaneous group advanced by 1·7 points to 305·8 owing to a rise in the prices of supari.

The index number of the Clothing and House Rent group remained constant.

(Average prices from July 1935 to June 1936=100)
